These four old final exams are all linked from the class homepage. All of these problems look like fair game to me, with the exceptions noted below. If you have questions, please post on piazza!

2017 Final exam. Problems 15, 16, and 17 are all good noise problems that you should be able to do.

2016 Final exam. Problem 2c,d are about layout and Coventor simulation software that we didn’t use this semester, so don’t worry about those. Problem 10 is a good noise problem.

2015 Final exam 2abcd, 4defgh are good noise problems.

2014 Final exam Problems 2j, 10, 11 are good noise problems.
