

Jelani Nelson

Curriculum Vitae

Department of EECS
Soda Hall 633
Berkeley, CA 94720-1776

minilek@berkeley.edu
<https://people.eecs.berkeley.edu/~minilek/>

Current Positions

- UC BERKELEY Berkeley, CA
- Chair, Department of Electrical Engineering and Computer Sciences, July 2025–present
 - Chair, Computer Science Division, Department of Electrical Engineering and Computer Sciences, July 2024–June 2025
 - Professor, Department of Electrical Engineering and Computer Sciences, July 2019–present
- GOOGLE Mountain View, CA
- Research Scientist, June 2021–present

Previous Positions

- HARVARD UNIVERSITY Cambridge, MA
- John L. Loeb Associate Professor of Engineering and Applied Sciences, Jul 2017–June 2019
 - Associate Professor of Computer Science, Jul 2017–June 2019
 - Assistant Professor of Computer Science, Jul 2013–Jun 2017
- INSTITUTE FOR ADVANCED STUDY Princeton, NJ
- Member, Sep 2012–Jun 2013
 - Mentor: Avi Wigderson
- PRINCETON UNIVERSITY Princeton, NJ
- Postdoctoral fellow, Center for Computational Intractibility, Jan 2012–Aug 2012
- MATHEMATICAL SCIENCES RESEARCH INSTITUTE Berkeley, CA
- Postdoctoral fellow, Program in Quantitative Geometry, Aug 2011–Dec 2011
 - Mentor: Adam Klivans

Education

- MASSACHUSETTS INSTITUTE OF TECHNOLOGY Cambridge, MA
- Ph.D. in Computer Science, June 2011.
 - Advisors: Professor Erik D. Demaine, Professor Piotr Indyk.
 - Thesis: *Sketching and Streaming High-Dimensional Vectors*.
- MASSACHUSETTS INSTITUTE OF TECHNOLOGY Cambridge, MA
- M.Eng. in Computer Science, June 2006.
 - Advisors: Dr. Bradley C. Kuszmaul, Professor Charles E. Leiserson.
 - Thesis: *External-Memory Search Trees with Fast Insertions*.
- MASSACHUSETTS INSTITUTE OF TECHNOLOGY Cambridge, MA
- S.B. in Computer Science, June 2005.
 - S.B. in Mathematics, June 2005.

Honors

- ACM Eugene L. Lawler Award, 2023.
- ACM SIGACT Distinguished Service Award, 2023.
- Best Paper Award, ACM Symposium on Principles of Database Systems (PODS). 2022.
- CRA-E Undergraduate Research Faculty Mentoring Award, 2022.
- International Congress of Mathematicians, Invited Lecture, 2022.
- Presidential Early Career Award for Scientists and Engineers (PECASE), 2017.
- Alfred P. Sloan Research Fellow, 2017.
- ONR Director of Research Early Career Grant, 2017–2022.
- Harvard University Clark Fund Award, 2017.
- ONR Young Investigator Award, 2015–2018.
- NSF Early Career Development (CAREER) Award, 2014–2019.
- George M. Sprowls Award, given for best doctoral theses in computer science at MIT, 2011.
- IBM Research Pat Goldberg Memorial Best Paper Award. 2010.
- Best Paper Award, ACM Symposium on Principles of Database Systems (PODS). 2010.
- Xerox Fellow. 2010–2011.
- National Defense Science and Engineering Graduate (NDSEG) Fellow. 2007–2010.
- Akamai Presidential Fellow. 2006–2007.
- Member of Phi Beta Kappa, Tau Beta Pi, and Eta Kappa Nu.

Professional Activities

- Member, Science Advisory Board, Institute for Pure and Applied Mathematics (IPAM), UCLA, February 2023–present.
- Member, External Advisory Board, Institute for Emerging CORE Methods in Data Science (EnCORE), UC San Diego, July 2024–present.
- Program committee member, 42nd Annual ACM Symposium on Principles of Database Systems (PODS), Santiago, Chile, July 2024.
- Program committee chair, 63rd IEEE Annual Symposium on Foundations of Computer Science (FOCS), Denver, CO, October–November 2022.

- Program committee member, 49th Annual International Colloquium on Automata, Languages and Programming (ICALP), Paris, France, July 2022.
- SIGACT Research Highlights Committee, 2020–21 (Member), 2021–2022 (Chair).
- Member, ACM Grace Murray Hopper Award Committee, 2021–present.
- Member, CRA Undergraduate Research Award Committee, 2021–2022.
- Member, SIGACT Committee for the Advancement of Theoretical Computer Science (CATCS), 2019–present.
- Associate Editor, *Mathematical Statistics and Learning*, 2017–present.
- Area Chair, 34th Annual Conference on Neural Information Processing Systems (NeurIPS), December 2021.
- Program committee member, 1st Annual SIAM Conference on Applied and Computational Discrete Algorithms (ACDA), Spokane, Washington, July 2021.
- Program committee member, 53rd Annual ACM Symposium on the Theory of Computing (STOC), Rome, Italy, June 2021.
- Member, Computing Innovation Fellows Selection Committee, 2019–2021.
- Program committee member, 23rd International Workshop on Randomization and Computation (RANDOM), Virtual Conference (online), August 2020.
- Program committee member, 10th Annual Conference on Innovations in Theoretical Computer Science (ITCS), Seattle, WA, January 2020.
- Program committee member, 31st Annual ACM-SIAM Symposium on Discrete Algorithms (SODA), Salt Lake City, Utah, January 2020.
- Program committee member, 2nd Annual Symposium on Simplicity in Algorithms (SOSA), San Diego, CA, January 2019.
- Program committee member, 21st Annual International Conference on Database Theory (ICDT), Vienna, Austria, March 2018.
- Program committee member, 49th Annual ACM Symposium on the Theory of Computing (STOC), Montreal, Quebec, Canada, June 2017.
- Program committee member, 28th Annual ACM-SIAM Symposium on Discrete Algorithms (SODA), New Orleans, Louisiana, January 2017.
- Program committee member, 44th Annual International Colloquium on Automata, Languages and Programming (ICALP), Warsaw, Poland, July 2017.
- Co-organizer (with Assaf Naor), workshop on “Chaining Methods and their Applications to Computer Science”, Harvard University, June 22–23, 2016.

- Program committee member, 13th Annual Conference on Theory and Applications of Models of Computation (TAMC), Xi'an, China, July 2016.
- Program committee member, 7th Workshop on Massive Data Algorithmics (MASSIVE), Patras, Greece, September 2015.
- Program committee member, 20th International Symposium on Fundamentals of Computation Theory (FCT), Gdańsk, Poland, August 2015.
- Program committee member, 16th International Workshop on Randomization and Computation (RANDOM), Berkeley, California, August 2013.
- Program committee member, 24th Annual ACM-SIAM Symposium on Discrete Algorithms (SODA), New Orleans, Louisiana, January 2013.
- Grant reviewing: National Science Foundation, U.S. Army Research Office, United States – Israel Binational Science Foundation.
- Conference reviewing: FOCS, STOC, SODA, ICML, NeurIPS, COLT, PODS, ICDT, CCC, RANDOM, ITCS, STACS, ISIT, SOCG, ESA, SPAA, ICASSP, MFCS, FCT, IPDPS, MASSIVE, SOSA, SPARS, TAMC
- Journal reviewing: SIAM J. Comput., J. Comp. Sys. Sci., Appl. Comp. Harm. Anal., Algorithmica, ACM Trans. Algor., ACM Trans. Database Syst., ACM Trans. Comput. Theor., Inf. Comput., IEEE Trans. Sig. Proc., J. Comb. Opt., IEEE Trans. Pattern Analysis and Machine Intelligence, IEEE Trans. Inf. Theory, Discrete and Computational Geometry, Statistics Surveys, J. Machine Learning Research, SIAM J. Mathematics of Data Science, Statistics Surveys, Theory of Computing

Doctoral Advisees

CURRENT STUDENTS

- Ishaq Aden-Ali (co-advised with Peter Bartlett)
- Xin Lyu (co-advised with Avishay Tal)
- Mihir Singhal (co-advised with Venkatesan Guruswami)
- Hongxun Wu (co-advised with Avishay Tal)

GRADUATED STUDENTS

- Haofeng (Fred) Zhang, 2024.
- Jarosław Błasiok, 2019.
- Vasileios Nakos, 2019.
- Zhengyu Wang, 2019.

Postdoctoral Fellows

SAMSON ZHOU

April '23–July '23

- Co-hosted with Vladimir Braverman at Rice University.
- Currently: Assistant Professor of Computer Science at Texas A&M.

SHAY GOLAN

October '21–October '22

- Supported by Office of Naval Research Director of Research Early Career Grant and a Fulbright postdoctoral award.

JAN VAN DEN BRAND

August '21–May '22

- Simons Fellow. Supported by Office of Naval Research Basic Research Challenge Program.
- Currently: Assistant Professor of Computer Science at Georgia Tech.

PARIS SYMINELAKIS

September '19–September '20

- Supported by Office of Naval Research Director of Research Early Career Grant and Basic Research Challenge Program.
- Currently: Research Scientist at Cruise.

RASMUS KYNG

January '18–June '19

- Supported by Office of Naval Research Director of Research Early Career Grant and Basic Research Challenge Program.
- Currently: Assistant Professor of Computer Science at ETH Zurich.

KYLE LUH

July '17–June '19

- Supported by NSF Mathematical Sciences Postdoctoral Research Fellowship.
- Currently: Assistant Professor of Mathematics at University of Colorado, Boulder.

HUACHENG YU

August '17–August '19

- Partially supported by Office of Naval Research Young Investigator Award and Director of Research Early Career Grant.
- Co-hosted with Madhu Sudan.
- Currently: Assistant Professor of Computer Science at Princeton University.

JAKUB PACHOCKI

July '16–January '17

- Supported partially by Office of Naval Research Young Investigator Award.
- Currently: Chief Scientist at OpenAI.

YI LI

November '14–October '15

- Supported partially by grant from Office of Naval Research.
- Currently: Associate Professor in the Division of Mathematical Sciences at Nanyang Technological University.

Undergraduate and High School Research Advising

MATTHEW DING

Summer '24

- UC Berkeley, Class of 2025. Completed research project on streaming algorithms for minimum cut (ITCS 2025, <https://arxiv.org/abs/2412.01143>).

CE JIN

Summer '18

- Tsinghua University, Class of 2020. Completed two research projects, one on approximation algorithms (ICALP 2019, <https://arxiv.org/abs/1904.09562>), and one on streaming algorithms (ITCS 2019, <https://arxiv.org/abs/1811.08205>).

SHYAM NARAYANAN

Summer '18

- Harvard College, Class of 2019. PRISE and Herchel-Smith Fellow. Completed two research projects, on pseudorandom walks (RANDOM 2019, <https://arxiv.org/abs/1807.04910>) and on dimensionality reduction (STOC 2019, <https://arxiv.org/abs/1810.09250>). CRA Outstanding Undergraduate Researcher Award recipient, 2018-19.

ALEXANDER WEI

Summer '18, September '19–May'20

- Harvard College, A.B. thesis *Optimal Las Vegas Approximate Near Neighbors in ℓ_p* , summa cum laude in computer science and mathematics. PRISE and Herchel-Smith Fellow, Hoopes Prize. Completed research project on approximate nearest neighbor search (SODA 2019, best student paper award, <https://arxiv.org/abs/1807.07527>). CRA Outstanding Undergraduate Researcher Award recipient, 2019-20.

MEENA JAGADEESAN

Summer '17, September '19–May'20

- Harvard College, A.B. thesis *The Performance of Johnson-Lindenstrauss Transforms: Beyond the Classical Framework*, summa cum laude in computer science and mathematics. PRISE and Herchel-Smith Fellow, Hoopes Prize. Completed two theoretical computer science research projects on random projections: (RANDOM 2019, <https://arxiv.org/abs/1708.02966>), (NeurIPS 2019 Oral Presentation, <https://arxiv.org/abs/1903.03605>). CRA Outstanding Undergraduate Researcher Award recipient, 2019-20.

JACOB TEO POR LOONG

Summer '17

- NUS High School, Singapore, Class of 2018. Participated in the Research Science Institute (RSI) and conducted a theoretical project in succinct data structures. Preprint: <https://arxiv.org/abs/1709.09574>.

MATT RAUEN

September '15–May'16

- Harvard College, A.B. thesis *Streaming Approximation Algorithms using Amnesic Dynamic Programming*, cum laude in mathematics and computer science.

MARTIN CAMACHO

September '13–May '14

- Harvard College, A.B. thesis *Spectral Sparsification: The Barrier Method and its Applications*, magna cum laude in mathematics and computer science.

Visitors Hosted

SHIVAM GUPTA	August '22–May '23
• Visiting student from UT Austin.	
ALEXANDER MATHIASSEN	January '20–May '20
• Visiting student from Aarhus University.	
VLADIMIR BRAVERMAN	April '19–May '19
• Visiting professor from Johns Hopkins.	
ZHAO SONG	August '17–May '18
• Visiting student from UT Austin.	
RADOSŁAW ADAMCZAK	June '16–July '16
• Visited from University of Warsaw.	
MIKKEL THORUP	March '16
• Visited from University of Copenhagen.	
SJOERD DIRKSEN	May '14–June '14, June '16–July '16
• Visited from University of Bonn.	
AMEYA VELINGKER	January '14–June '14
• Visiting student from Carnegie Mellon University.	

Teaching

UC Berkeley:

CS 270: GRADUATE ALGORITHMS	Spring '23
• Primary graduate course on the design and analysis of algorithms.	
CS 294-165: SKETCHING ALGORITHMS	Fall '20
• New graduate course.	
CS 170: EFFICIENT ALGORITHMS AND INTRACTABLE PROBLEMS	Spring '20, Fall '21, Fall '22
• Core undergraduate course for EECS and CS majors.	
• Joint with Prof. Alessandro Chiesa in Spring '20; solo-taught Fall '21; joint with Prof. Jim Demmel in Fall '22.	

Harvard:

CS 224: ADVANCED ALGORITHMS	Fall '14, Spring '17
• Graduate course, redesigned version of CS 226r: Efficient Algorithms.	
CS 226: SKETCHING ALGORITHMS FOR BIG DATA (FORMERLY CS 229R)	Fall '13, '15, '17
• New graduate course.	

CS 124: DATA STRUCTURES AND ALGORITHMS

Spring '14, '15, '18, '19

- Core undergraduate course for computer science concentrators.

CS 125: ALGORITHMS & COMPLEXITY

Fall '16

- Core undergraduate course for computer science concentrators.

ADDITIONAL TEACHING

- Lecturer at summer school “Mathematical methods for high-dimensional data analysis”, Technische Universität München, Germany, July 2016.
- Summer course on algorithms for high schoolers in Jamaica (<https://jamcoders.org.jm>), Summers 2022-25.
- Summer course on algorithms for high schoolers in Ethiopia (<https://www.addiscoder.com>), Summers 2011, 2016, 2018, 2019, 2023-25.
- Lecturer at MathROOTS@MIT, June 23, 2016 and June 18, 2018.
- Lecturer at “MADALGO Summer School on Streaming Algorithms”, August 2015.
- Week-long course on algorithms for high schoolers in St. Thomas, USVI (<http://www.usvicoder.com>), January 2015.
- Invited tutorial “Data Mining in Streams” given at KDD 2012 (joint with Edo Liberty).
- Co-coach, with Bob Walton, for Harvard ACM International Collegiate Programming Contest team, August 2015–present.
- Student coach for MIT ACM International Collegiate Programming Contest team, August 2006–September 2009.

External Funding

Research Funding

- NSF CCF AF Medium. “Collaborative Research: AF: Medium: Sketching for privacy and privacy for sketching”, co-PI with Huy L. Nguyễn (Northeastern). \$1,200,000 (Berkeley portion: \$600,000), 10/23–9/27.
- NSF CCF AF Small. “Collaborative Research: AF: Small: Dynamic data structures for vectors and graphs in sublinear memory”, co-PI with Huy L. Nguyễn (Northeastern). \$500,000 (Berkeley portion: \$250,000), 10/19–9/23.
- Office of Naval Research Basic Research Challenge Program. “Dimensionality Reduction and Randomized Linear Algebra: Foundations and New Directions”, co-PI with David Woodruff (Carnegie Mellon University). \$1,199,987 (Berkeley portion: \$596,333), 6/18–6/23.
- Sloan Research Fellowship. \$60,000.00, 9/17–9/19.
- Office of Naval Research Director of Research Early Career Grant. “Sketching Methods for High-Dimensional Data Analysis.” \$1,000,000.00, 7/17–6/23.
- Office of Naval Research Young Investigator Award. “Randomized Dimensionality Reduction Methods for Machine Learning.” \$510,000.00, 6/15–5/18.

- NSF BIGDATA program. “BIGDATA: F: DKA: Randomized methods for high-dimensional data analysis.” \$285,000.00 (+ \$2,800 REU Supplement), 9/14–8/18.
- Office of Naval Research grant. “Dimensionality reduction methods for machine learning.” \$120,000.00, 7/14–7/15.
- NSF Early Career Development Award. “Sketching Algorithms for Massive Data.” \$512,818.00, 5/14–4/19.
- Google Faculty Research Award. \$53,010. 2/14.

Other Funding

- Office of Naval Research grant. “Chaining methods and their applications to computer science”, to support speaker travel expenses, \$10,000.00, 6/16–5/17.
- NSF Algorithmic Foundations grant. “Chaining methods and their applications to computer science”, to support conference attendance by postdocs and students, \$10,000.00, 4/16–3/17.

Patents

- Pasin Manurangsi, Badih Ghazi, Shanmugasundaram Ravikumar, Jelani Nelson. *Privacy sensitive estimation of digital resource access frequency*, World Intellectual Property Organization Patent #WO 2024/039474 A1.
- Jelani Nelson, David P. Woodruff. *Aggregate Contribution of Iceberg Queries*, US Patent #8,499,003 B2.
- Jelani Nelson, David P. Woodruff. *Summarizing Internet Traffic Patterns*, US Patent #8,310,922 B2.

Refereed Journal Articles

- [1] Yeshwanth Cherapanamjeri and Jelani Nelson. Terminal embeddings in sublinear time. *TheoretCS*, 3, 2024. Preliminary version in FOCS 2021.
- [2] Mark Bun, Jelani Nelson, and Uri Stemmer. Heavy hitters and the structure of local privacy. *ACM Trans. Algorithms*, 15(4):51:1–51:40, 2019. Preliminary version in PODS 2018.
- [3] Miklós Ajtai, Vitaly Feldman, Avinatan Hassidim, and Jelani Nelson. Sorting and selection with imprecise comparisons. *ACM Transactions on Algorithms*, 12(2), February 2016. Preliminary version in ICALP 2009.
- [4] Jean Bourgain, Sjoerd Dirksen, and Jelani Nelson. Toward a unified theory of sparse dimensionality reduction in Euclidean space. *Geometric and Functional Analysis (GAFA)*, 25(4):1009–1088, July 2015. Preliminary version in STOC 2015.
- [5] Daniel M. Kane and Jelani Nelson. Sparser Johnson-Lindenstrauss transforms. *J. ACM*, 61(1):4, January 2014. Preliminary version in SODA 2012.

- [6] Jelani Nelson, Huy L. Nguyễn, and David P. Woodruff. On deterministic sketching and streaming for sparse recovery and norm estimation. *Lin. Alg. Appl.*, 441:152–167, January 2014. Preliminary version in RANDOM 2012.
- [7] Timothy G. Abbott, Michael Burr, Timothy M. Chan, Erik D. Demaine, Martin L. Demaine, John Hugg, Daniel M. Kane, Stefan Langerman, Jelani Nelson, Eynat Rafalin, Kathryn Seyboth, and Vincent Yeung. Dynamic ham-sandwich cuts in the plane. *Comput. Geom.*, 42(5):419–428, July 2009. Preliminary version in CCCG 2005.

Refereed Conference Publications

Excludes conference publications for which a journal version appeared later.

- [1] Matthew Ding, Alexandro Garces, Jason Li, Honghao Lin, Jelani Nelson, Vihan Shah, and David P. Woodruff. Space complexity of minimum cut problems in single-pass streams. In *Proceedings of the 16th Annual Conference on Innovations in Theoretical (ITCS)*, January 2025.

Invited Talks at Workshops and Conferences

- [T1] Sketching algorithms. *35th Brazilian Mathematics Colloquium, Plenary Speaker, IMPA, Rio De Janeiro, Brazil*, July 2025.
- [T2] Smartphone privacy: how to learn from distributed, private data. *SIAM Conference on Mathematics of Data Science, Atlanta, GA*, October 2024.
- [T3] New local differentially private protocols for frequency and mean estimation. *Applied Algorithms for Machine Learning, Rice Global Paris Center, France*, June 2024.
- [T4] New upper and lower bounds on approximate counting. *Extroverted Sublinear Algorithms, Simons Institute, UC Berkeley, CA*, June 2024.
- [T5] Understanding the power of algorithms. *iiAfrica Industry Engagement Forum 2024, Accra, Ghana*, May 2024.

- [T6] New local differentially private protocols for frequency and mean estimation. *EnCORE Workshop on Computational vs Statistical Gaps in Learning and Optimization*, UCLA, CA, February 2024.
- [T7] Sketching: core tools, learning-augmentation, and adaptive robustness. *NeurIPS, Plenary Speaker*, New Orleans, LA, December 2023.
- [T8] New local differentially private protocols for frequency and mean estimation. *ACDA, Plenary Speaker*, Seattle, WA, May 2023.
- [T9] New local differentially private protocols for frequency and mean estimation. *Boston Privacy Day*, Boston University, MA, May 2023.
- [T10] Private frequency estimation via projective geometry. *FSTTCS Workshop on Algorithms under Uncertainty*, IIT Madras, Chennai, India, December 2022.
- [T11] Private frequency estimation via projective geometry. *ICERM Workshop on Probabilistic Methods in Geometry and Analysis*, Brown University, Providence, RI, October 2022.
- [T12] Private frequency estimation via projective geometry. *Workshop on Learning and Optimization in Luminy*, Centre International de Rencontres Mathématiques, Marseille, France, October 2022.
- [T13] Dimensionality Reduction — a survey. *Sublinear Algorithms Workshop*, MIT, Cambridge, MA, August 2022.
- [T14] Forty years of frequent items. *2022 International Congress of Mathematicians*, Online, July 2022.
- [T15] Recent advances in streaming and private heavy hitters. *35th Annual Conference on Learning Theory (COLT)*, Plenary Speaker, London, UK, July 2022.
- [T16] Private frequency estimation via projective geometry. *IDEAL Workshop on Algorithms for Massive Data Sets*, Northwestern University, Evanston, IL, May 2022.
- [T17] Private frequency estimation via projective geometry. *TOCA-SV*, Stanford University, Stanford, CA, April 2022.
- [T18] Smartphone privacy: From Fourier transforms to projective geometry and more. *Math Encounters Talk Series*, Museum of Math, New York, NY, March 2022.
- [T19] Optimal bounds for approximate counting. *Workshop on Algorithms for Large Data*, Online, August 2021.
- [T20] A survey on random projections. *25th International Workshop on Randomization and Computation (RANDOM)*, Online, August 2021.
- [T21] Optimal bounds for approximate counting. *Workshop on Local Algorithms*, Online, June 2021.
- [T22] Sketching and streaming algorithms. *NeurIPS Invited Tutorial*, December 2020.

- [T23] Optimal terminal dimensionality reduction in Euclidean space. Workshop on Computational Aspects of Learning and Processing Metrical Data (Online), Computational Geometry Week, June 2020.
- [T24] Optimal terminal dimensionality reduction in Euclidean space. *One World Mathematics of Information, Data, and Signals (OW-MINDS) Seminar, Online*, June 2020.
- [T25] A survey on random projections. *31st International Conference on Algorithmic learning Theory (ALT), Invited Tutorial, San Diego, CA*, February 2020.
- [T26] Optimal terminal dimensionality reduction in Euclidean space. *Randomness and Determinism in Compressive Data Acquisition, Texas A&M, College Station, TX*, July 2019.
- [T27] Sampling from sketching, an optimal lower bound. *Summer Informal Regional Functional Analysis Seminar, Texas A&M, College Station, TX*, July 2019.
- [T28] Streaming algorithms (two lectures). *Ethiopian Physical Society in North America (EPSNA) Summer School, AASTU, Addis Ababa, Ethiopia*, July 2019.
- [T29] Recent advances in random projections. *Conference for African American Researchers in the Mathematical Sciences (CAARMS), Princeton, NJ*, June 2019.
- [T30] Sampling from sketching, an optimal lower bound. *CS+Math Workshop on Metric Embeddings and Dimensionality Reduction, Northwestern University, Chicago, IL*, May 2019.
- [T31] Optimal terminal dimensionality reduction in Euclidean space. *Banach Space Theory and Metric Embeddings, Spring Eastern Sectional Meeting, Hartford, CT*, April 2019.
- [T32] Recent advances in dimensionality reduction. *Midwest Theory Day, Plenary Speaker, Purdue University, West Lafayette, IN*, April 2019.
- [T33] Sparse recovery, sampling, and dynamic data structures for graph problems. *February Fourier Talks, University of Maryland, College Park, MD*, February 2019.
- [T34] The BPTree: improved insertion-only ℓ_2 heavy hitters. *25 years of Conferences for African-American Researchers in the Mathematical Sciences, Joint Mathematics Meetings, Baltimore, MD*, January 2019.
- [T35] Sketching big data. *Simons Institute Open Lecture Series, Berkeley, CA*, November 2018.
- [T36] Panel discussion on youth employment in ICT: the skills gap. *ICT Expo, Addis Ababa, Ethiopia*, July 2018.
- [T37] Recent advances in dimensionality reduction with provable guarantees. *SIAM Annual Meeting, Portland, OR*, July 2018.
