## CORRECTION

### UNIQUENESS OF STATIONARY ERGODIC FIXED POINT FOR A $\cdot / M / K$ NODE

By V. ANANTHARAM

*The Annals of Applied Probability* (1993) **3** 154–172

The following three corrections should be made to the paper above.

In the statement of Lemma 1 and its proof, and in the concluding remarks,  $\mathcal{M}_s(\lambda)$  should be replaced by  $\cup_{0 \leq \eta \leq \lambda} \mathcal{M}_s(\eta)$ .

On page 162, line 8,  $\mathcal{M}_s(\lambda, \lambda)$  should be replaced by  $\cup_{0 \leq \eta, \zeta \leq \lambda} \mathcal{M}_s(\eta, \zeta)$ .

For the concluding remarks the definition of  $\bar{\rho}_\mu$  has to be extended to  $\cup_{0 \leq \eta \leq \lambda} \mathcal{M}_s(\eta)$  in the obvious way.
