Instructions for printing from Scope using LabVIEW Signal Express in 140 Cory:

1) open LabView Signal Express:

2) Setup LabVIEW to acquire signals

3) Select Device from drop down menu in step setup Tab
   Our scope is “HP54645”
4) Capture Data:

drag signals from scope onto plot area in dataview tab. Click “Run Once” to capture traces onto the plot area. right click in plot area and go to “view as” if you wish to view as XY instead of waveform.

5) Print
