Request to enroll in CS261

Your name: _____, _____
(last) (first)

1. What year are you? (e.g., 3rd year EECS ugrad, 4th year Math ugrad)

2. Are you currently on the Telebears waitlist?

3. Did you take CS61(b)? What grade did you get in it?

4. Did you take CS162? What grade did you get in it?

5. (for undergraduates) Have you ever taken a graduate course before? If so, which class, and what grade did you get in it?

6. Do you have any prior research experience? If so, when, with who, and in what research area?

7. In a single-threaded operating system, are there any types of operations one must avoid performing while inside a kernel page-fault handler with interrupts off? If so, which ones?

8. Most implementations of `traceroute` currently work using UDP packets. Could they be changed to use TCP packets? Why or why not?
