Today	
Windowing and Viewing Transformations	
Windows and viewports	
Orthographic projection	
Perspective projection	
2	
	2

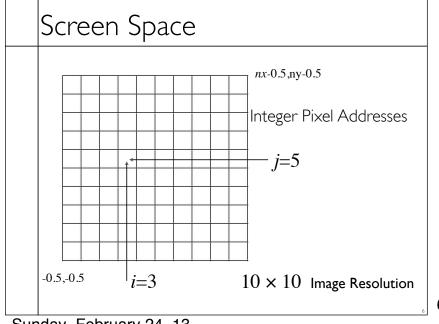

Screen Space

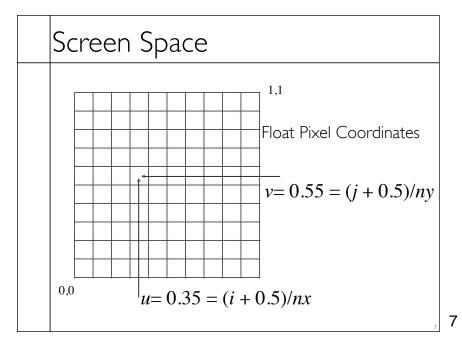

- Viewport is somewhere on screen
 - You probably don't care where
 - Window System likely manages this detail
- Sometimes you care exactly where
- Viewport has a size in pixels
 - Sometimes you care (images, text, etc.)
- Sometimes you don't (using high-level library)

Ray Generation vs. Projection

Viewing in ray tracing

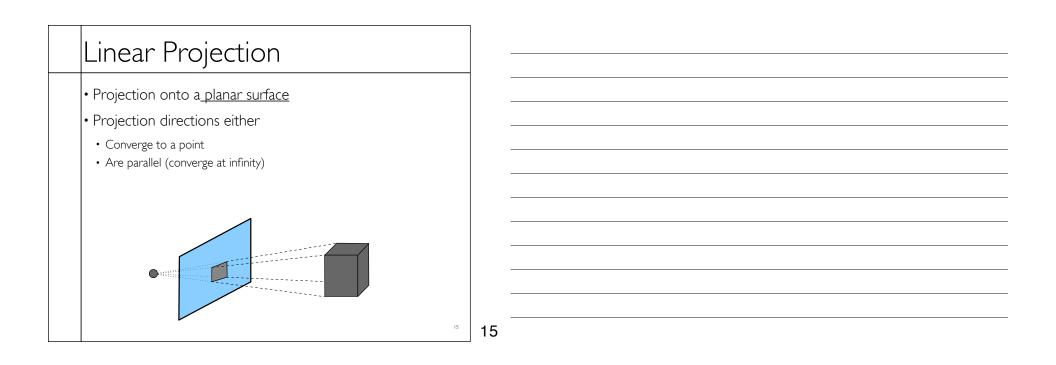

- start with image point
- compute ray that projects to that point
- do this using geometry

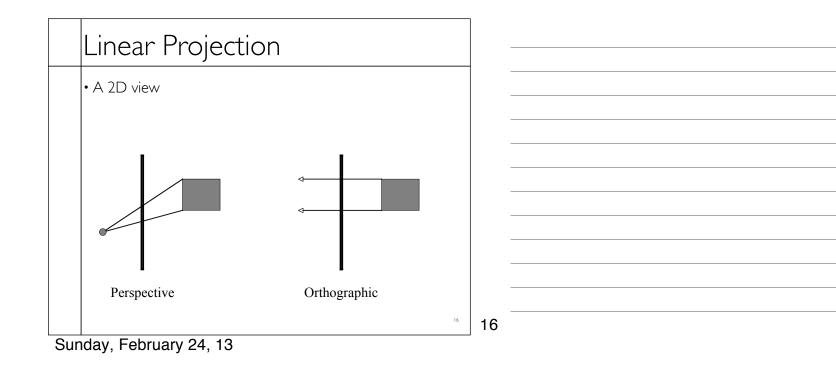

Viewing by projection

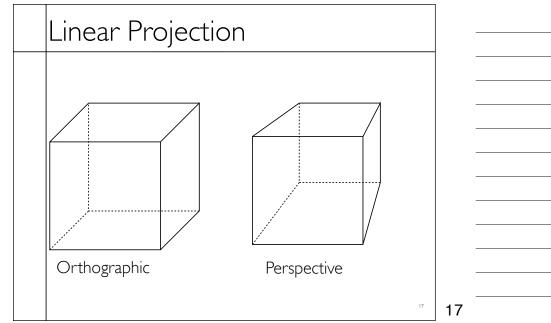

- start with 3D point
- compute image point that it projects to
- do this using transforms

Inverse processes

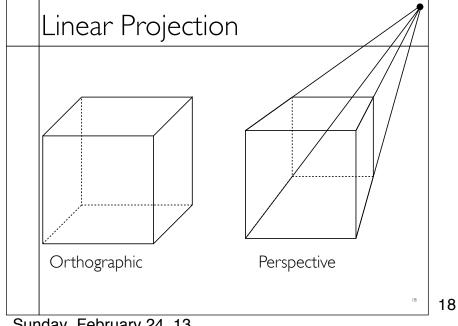

• ray gen. computes the preimage of projection

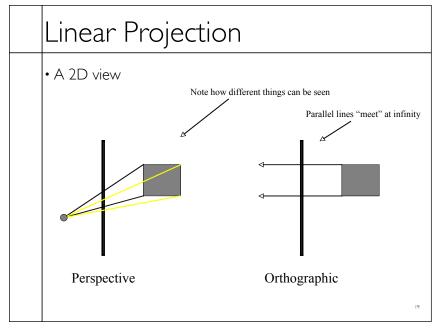

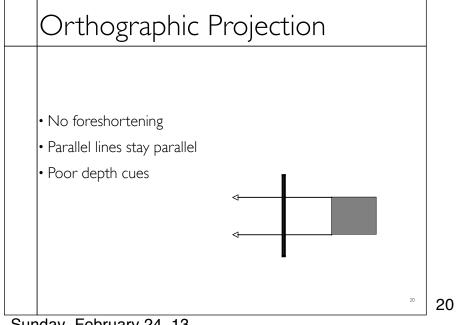

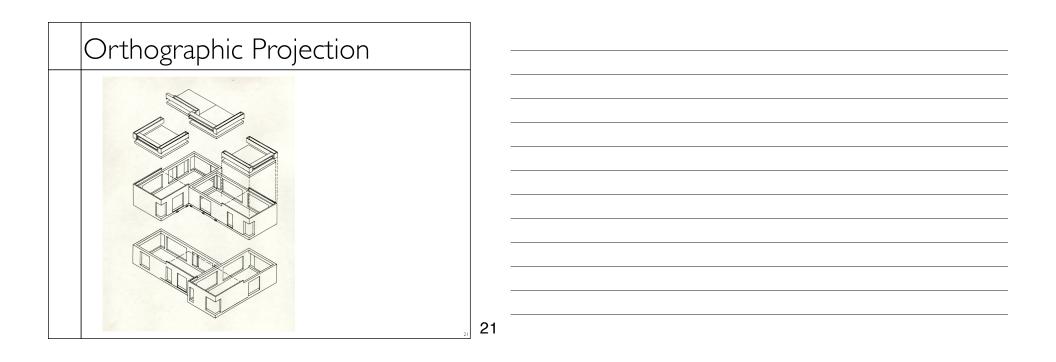

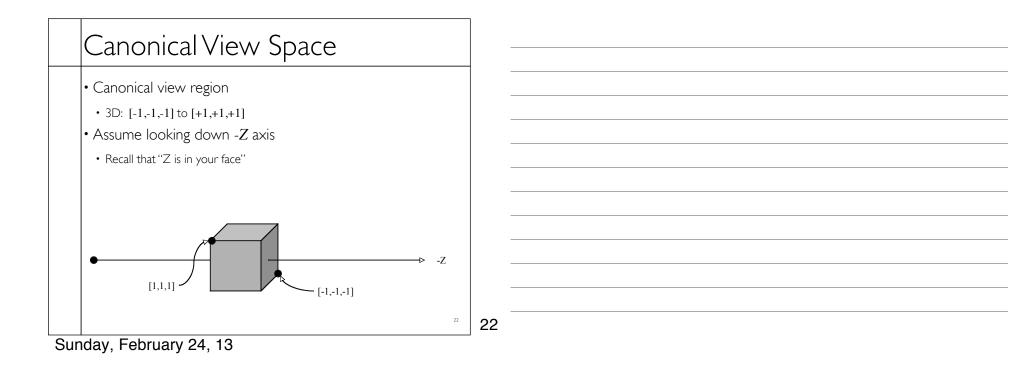

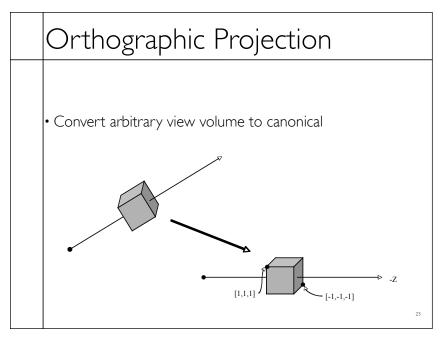

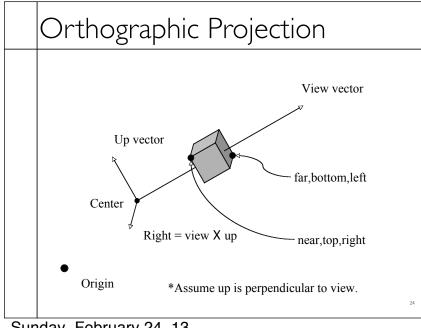

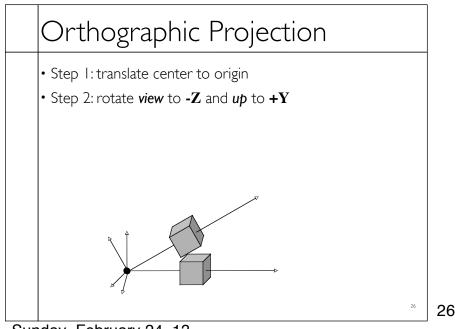

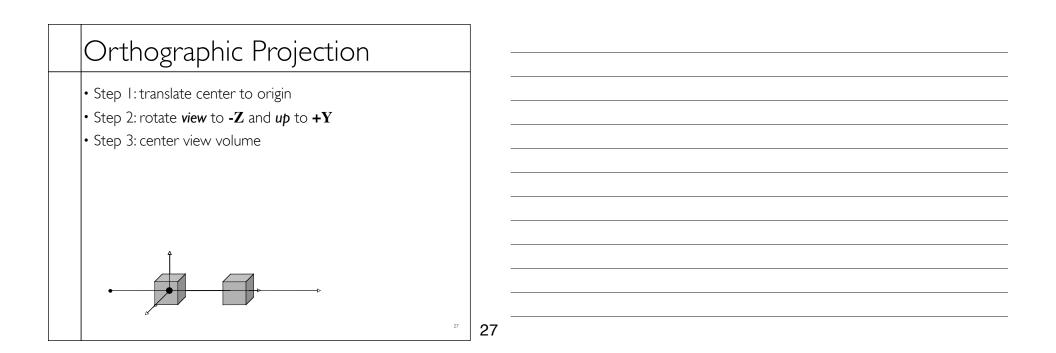

Orthographic Projection	
Step I: translate center to origin
