CS 61B Lab 4
February 9-11, 2000

Show your TA or lab assistant your progress on Project 1. You may use the rest of the lab to work on your project. When your TA is finished with check-offs, you may use this as an opportunity to ask the TA or lab assistant any questions you have about the project.

If you wish to continue working when your lab time ends, please move to 275 Soda (unless yours is the last lab of the day). During the overflow labs, the TA may have to ask you to leave 275 as well if room runs out.

Check-off
----

4 points: Demonstrate Part I of your Project by running Simulation or SimText. Your simulation doesn't need to be bug-free, but it should be working in an interesting way.

If you haven't progressed far enough for a full check-off, show the TA the code you have written so far for partial credit.
