

# Full Title of Article

**author names withheld**

**Editor:** Under Review for ALT 2022

## Abstract

This is a great paper and it has a concise abstract.

**Keywords:** List of keywords

## 1. Introduction

This is where the content of your paper goes.

- Use the `\documentclass[anon,12pt]{alt2022}` option during submission process – this automatically hides the author names listed under `\altauthor`. Do not include author names in the remainder of the text, and to the extent possible, avoid directly identifying the authors. You should still include all relevant references, including your own, and any other relevant discussion, even if this might allow a reviewer to infer the author identities.
- The `jmlr` class automatically loads `natbib` and automatically sets the bibliography style, so you don’t need to use `\bibliographystyle`. This sample file has the citations defined in the accompanying BibTeX file `jmlr-sample.bib`. For a parenthetical citation use `\citep`. For example: “ALT 2020 proceedings (?)”. For a textual citation use `\citet`. For example: “The proceedings were edited by ?”. Both commands may take a comma-separated list.

These commands have optional arguments and have a starred version. See the `natbib` documentation for further details.<sup>1</sup>

## Appendix A. My Proof of Theorem 1

This is a very technical proof.

## Appendix B. My Proof of Theorem 2

This is a complete version of a proof sketched in the main text.
