LT0/PSG = "Blue sky"

poly, notified, HT0, E05 continued

Oxides: always compatible with "silicon" work

Gribose: always tessile (oven stress relieved) For poly: same between similar oxides

Last: fine; residual stress, stress grooves
Set aside double patterns SHP

Attached Striker

Otherwise 90° to Striker around edge

That leaves all P2 or any cracks

Need a large recess (14 in or 15.75 cm)

Benefits of sidepanels

Hollow studs (Fudy)

Small gaps

Stairs
or use 241 PIFE Pl.
